

Mobile Experience Design — Religious Organization Calendar App

React Native · iOS & Android

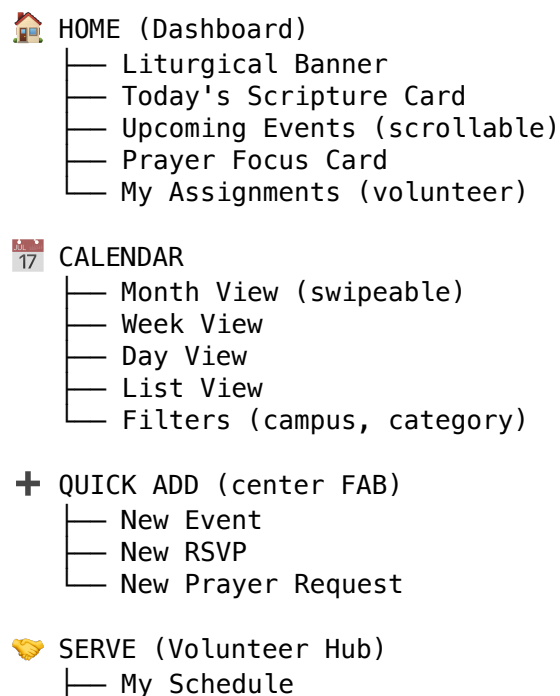

1. Design Philosophy

Principle	Rationale
Thumb-zone first	Primary actions within natural thumb reach (bottom 60% of screen)
Liturgical immersion	Season colors and imagery subtly theme the entire app
Glanceable	Key info visible without scrolling or tapping
Offline-capable	Cached schedule viewable without connectivity (syncs when online)
Inclusive	Dynamic type, VoiceOver/TalkBack, high-contrast mode, RTL support
Notification-led	Push notifications drive engagement with deep-links to relevant screens

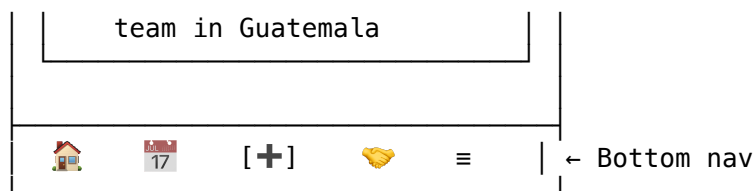

2. Information Architecture & Navigation

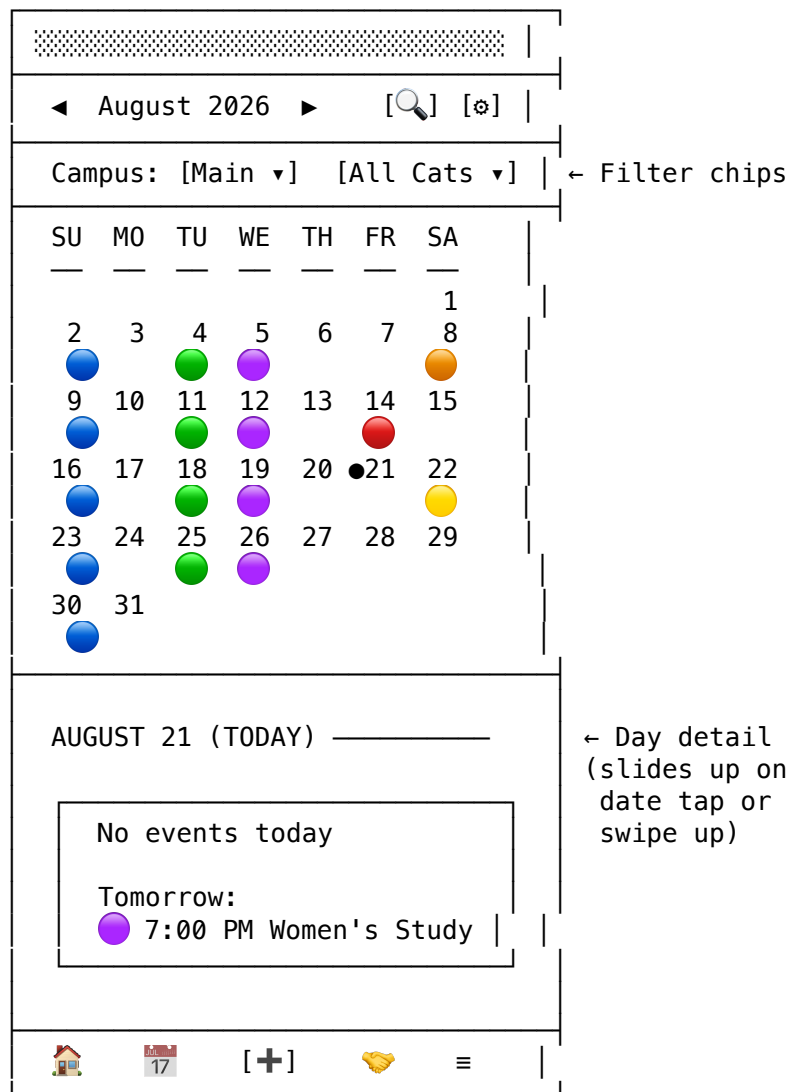

Tab Structure:

- ≡ MORE

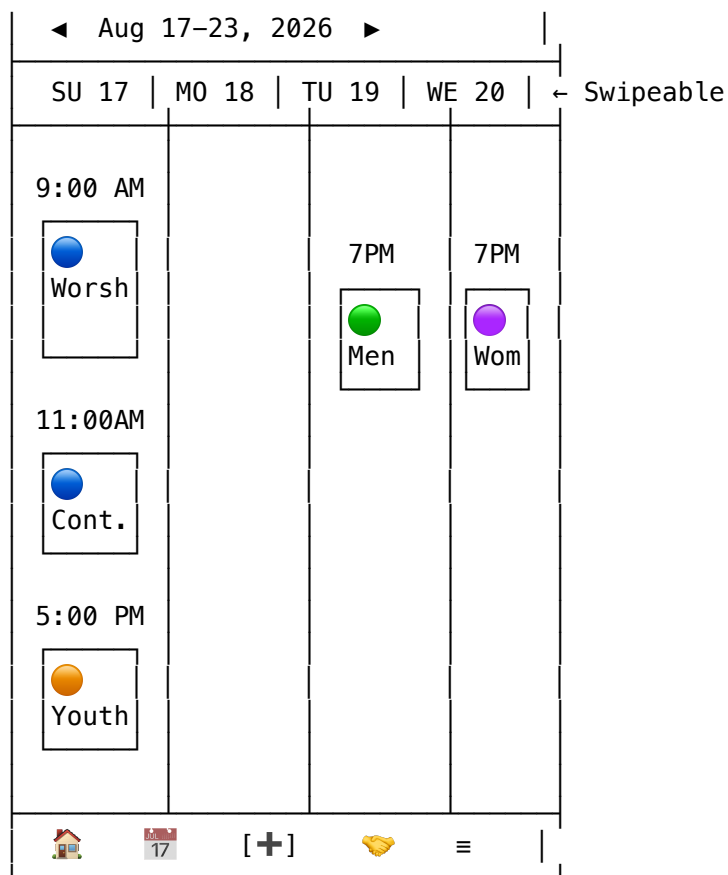

3.2 Calendar — Month View

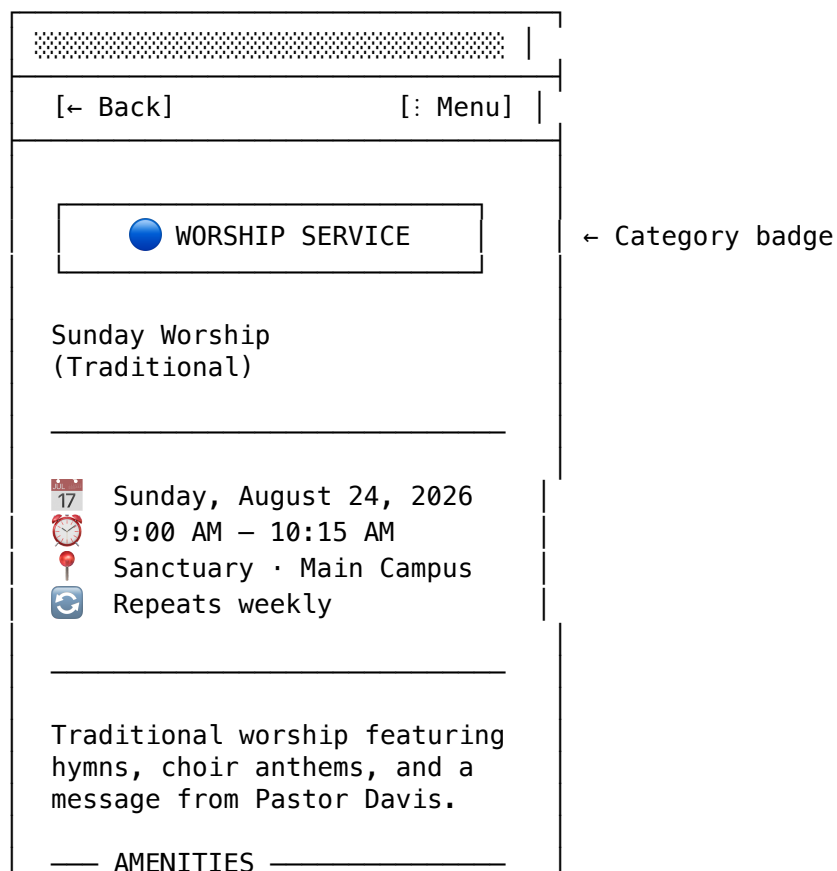

Interactions:

- Swipe left/right → next/previous month
- Tap date → bottom sheet slides up with that day's events
- Pinch → toggle between month and week view
- Long-press date → quick-add event on that date

3.3 Calendar — Week View (Horizontal scroll)

3.4 Event Detail (Full Screen)

3.10 My Groups

4. Gesture & Interaction Patterns

Gesture	Context	Action
Swipe left/right	Calendar month	Navigate months
Swipe left on event card	Event list	Quick RSVP or dismiss
Swipe right on assignment	Volunteer list	Confirm shift
Pull down	Any list	Refresh data
Long press on date	Calendar	Quick-add event
Pinch in/out	Calendar	Toggle month ↔ week view
Tap + hold event	Calendar	Drag to reschedule (leaders+)
3D Touch / Haptic	Event card	Peek at event detail

5. Push Notification Strategy

Notification Type	Timing	Deep Link
Event reminder	1 hour before (configurable)	Event detail screen
Volunteer reminder	24h before assigned shift	Serve → My Schedule
Volunteer gap alert	When opening posted	Serve → Openings
Event cancellation	Immediately	Event detail (shows cancelled)
RSVP confirmation	On registration	Event detail
Swap request	When someone requests swap	Serve → Swap Requests
New event (subscribed category)	On publish	Event detail
Weekly digest	Sunday 7 AM	Home dashboard
Scripture of the day	6 AM daily (opt-in)	Home → Scripture card

6. Offline Mode

Feature

Offline Behavior

Feature	Offline Behavior
Calendar view	Shows cached events (synced within last 24h)
Event details	Cached details available
RSVP	Queued locally; syncs when online
Volunteer confirm/decline	Queued locally; syncs when online
Event creation	Saved as draft; publishes when online
Scripture readings	Cached for current week
Push notifications	Received when back online
Visual indicator	Subtle banner: "Offline · Changes will sync"

7. Accessibility Features

Feature	Implementation
Dynamic Type	All text respects iOS/Android font scaling
VoiceOver / TalkBack	Full semantic labels on all interactive elements
Color contrast	WCAG 2.1 AA minimum (4.5:1 text, 3:1 UI)
Color-blind safe	Category dots include unique shapes as secondary indicator
Reduce Motion	Respects system setting; disables parallax/animations
High Contrast Mode	Bolder borders, no translucency
RTL Support	Full mirror layout for Arabic, Hebrew
Haptic feedback	Confirmation taps on actions (iOS Taptic Engine)
Focus management	Logical tab order in forms

8. Theming — Liturgical Seasons

Season	Primary Color	Accent	Background Tint
Advent	Deep Purple	Gold	#F3E8FF
Christmas	White/Gold	Red	#FFFBEB
Epiphany	Green	Gold	#F0FFF4
Lent	Purple	Grey	#FAF5FF
Holy Week	Red/Black	Gold	#FFF5F5
Easter	White/Gold	Green	#FFFFFF0
Pentecost	Red	Orange	#FFF5F5
Ordinary Time	Green	Brown	#F0FFF4

The app subtly adapts its header gradient, liturgical banner, and accent colors to reflect the current season — creating a sense of rhythm and sacred time.

9. Widget Support

iOS Widgets (WidgetKit)

Size	Content
Small (2×2)	Today's scripture reference + liturgical color
Medium (4×2)	Next 2 upcoming events with time & location
Large (4×4)	Week-at-a-glance mini calendar + today's events
Lock Screen	Next event countdown + scripture verse

Android Widgets (Glance)

Size	Content
2×1	Next event with countdown
3×2	Today's events list (scrollable)
4×3	Week calendar with event indicators
4×1	Scripture of the day banner

10. Key Animations & Transitions

Transition	Type	Duration
Tab switch	Cross-fade	200ms
Event card → Detail	Shared element (card expands)	350ms
Bottom sheet (Quick Add)	Spring slide-up	300ms
Calendar month change	Horizontal slide	250ms
Confirm/decline	Checkmark/X lottie animation	400ms
Pull-to-refresh	Custom spinner (cross rotation)	Continuous
Liturgical season change	Gradient morph over 2 days	1000ms

11. Platform-Specific Considerations

Aspect	iOS	Android
Navigation	Bottom tabs + swipe back	Bottom nav + system back
Notifications	APNs + Notification Extensions	FCM + Notification Channels
Widgets	WidgetKit (SwiftUI)	Glance (Jetpack Compose)
Biometrics	Face ID / Touch ID	Fingerprint / Face Unlock
Calendar sync	EventKit integration	CalendarProvider
Sharing	UIActivityViewController	Share Intent
Deep links	Universal Links	App Links
Offline storage	Core Data / Realm	Room DB
